### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. David Victor on 12/09/2004.

The application has been amended as follows:

Claim 18: replaced at the beginning "The system of claim," with "**The system of claim 13,**"

### *Reasons for Allowance*

1. Claims 1-36 are allowed.
2. The following is an examiner's statement of reasons for allowance:

While Barrett discloses a reprogrammable network communication device for reprogramming the reprogrammable read only memory using a software module. A processor for confirming the new programing image is compatible with the current network configuration.

Beyda teaches a device locator automatically identifies one of the devices for determination of the device-level software needs in order to facilitate system upgrades in which there is a required association between the device and specific board-level software.

Art Unit: 2121

And Craig (new cited reference with the same assignee) teaches a network computer firmware is to be updated upon determination of the need to update the firmware by a Simple Network Management Protocol (SNMP) query to an SNMP agent resident on the network computer.

None of these references taken either alone or in combination discloses a method and device for updating code in a nodal system having all the claimed features of applicant's instant invention, specifically including: at least one querying node transmits a request for a level of the code to at least two queried nodes in the nodal system; the one querying node receiving responses from multiple queried nodes indicating the levels of code at the queried nodes; determining whether at least two queried nodes have a higher code level. Also, there is no motivation to combine the references to meet these limitations. It is for these reasons that applicant's invention defines over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
